

When I started CH Precision 10 years ago, it was with the goal of not just creating the highest performance audio circuitry, but leveraging it with the flexibility of powerful, software-driven control systems and modular design, construction and application. Now, 10 years on I can proudly say that CH Precision is widely recognised as setting new standards in all three of those areas, firmly established as one of the benchmark brands in high-end audio.

Florian Cossy
CEO, CH Precision
